

Factory Construction and Supply Chain Management Services

Comprehensive services are available for factory construction and supply chain management. Services include assembly localization, product testing, and on-site training.

Service Overview

Comprehensive Assembly Localization

This service provides a complete solution for the localization of MCB and RCCB assembly, enabling businesses to realize self-production capabilities. We offer end-to-end guidance, from ensuring product testing compliance to optimizing production costs. Our experts provide on-site training and assembly production support to ensure seamless integration and operational efficiency.

Technical Standards

Testing Compliance

10kA MCB Testing, 6kA MCB Testing, RCCB 6kA Compliance, Temperature Rise Test

Service Features

Core Service Offerings

- Self-production realization support
- Product testing assurance
- Price competitiveness optimization
- On-site technical training
- Assembly production guidance
