

Fan and Exhaust Fan Components

These components are suitable for assembling or repairing electric fans. The parts are made from durable, injection-molded plastic.

Product Overview

High-Quality Fan & Exhaust Components

This assortment of fan and exhaust fan components is engineered for reliability and durability in assembly and repair applications. Crafted from high-grade, injection-molded black plastic, these parts are designed to withstand challenging environmental conditions while ensuring consistent performance. The kit includes essential structural elements such as housings, mounting brackets, gaskets, and seals, providing a comprehensive solution for maintaining or manufacturing various electric fan systems.

Technical Specifications

Compatible Fan Types

- Table Fans
- Ceiling Fans
- Exhaust Fans

Durability Features

Environmental Resistant • Injection-Molded • Long-lasting Performance

Material	Injection-molded plastic
Color	Black
Included Components	Housings, Mounting Brackets, Gaskets, Seals
