

Fan-Cooled Upright Freezer with Glass Door

This upright freezer utilizes a fan cooling system to maintain consistent temperatures. It features a glass door for easy viewing of contents and adjustable wire shelves for flexible storage.

Overview

Professional Upright Freezer

This high-performance upright freezer features advanced fan-cooling technology to maintain a consistent internal temperature of -22°C. Designed for commercial durability, it includes a double-layer tempered glass door with integrated heating to ensure clear visibility and prevent frost buildup. With energy-efficient LED lighting and a robust copper-fin cooling system, this unit provides reliable storage and optimal display capabilities for your inventory.
