Product Overview

Professional Fan Speed Control

This fan speed control dial offers precise adjustment capabilities for residential and commercial ventilation systems. Engineered for durability, the device features high-quality silver alloy contacts designed to resist electric arcing and melt welding, ensuring a long service life of over 40,000 operations. The internal components utilize phosphor bronze for superior electrical conductivity and lasting elasticity, providing a reliable solution for variable fan speed management.

Technical Specifications

Contact Material	Silver alloy
Socket Material	Phosphor bronze
Operational Life	40000 cycles

Compliance & Standards

Certifications	CE, CB, BS, SASO, GOST, RoHS

Product Features

Performance Highlights

- High-performance electric arc resistance
- Melt-weld resistant contacts
- Superior electrical conductivity
- Lasting socket elasticity
