Product Overview

Efficient Far-Infrared Heating

This advanced far-infrared space heater features a durable all-aluminum body and utilizes specialized heating elements for direct, comfortable warmth. Designed for both residential and commercial environments, it operates silently without a fan, making it ideal for spaces like restaurants, offices, and bedrooms. With intelligent variable frequency energy-saving technology and Wi-Fi app control, it offers precise climate management for modern interiors.

Technical Specifications

Waterproof Rating

IP65

Heating Element

Aluminum with far-infrared radiation surface coating

Operational Noise

Silent (Fanless design)

Smart Features

Control Features

- Intelligent Variable Frequency Energy-saving
- Temperature setting
- Remember function
- Child safety lock

Connectivity

Tuya WIFI App Control

Safety

Safety Protections

Over-heat protection, Child safety lock

Applications

Suitable Environments

- Residential (Living room, Bedroom, Bathroom)
- Commercial (Restaurant, Coffee shop, KTV, Shopping mall)
- Public/Professional (Yoga rooms, Aisle, School)
