

Fax Machine Uninterruptible Power Supply

This uninterruptible power supply protects fax machines and sensitive electronics from power outages and fluctuations. It provides battery backup to ensure continuous operation and prevent data loss.

Overview

Reliable Backup Power for Fax Communications

This Uninterruptible Power Supply (UPS) is specifically engineered to protect fax machines and sensitive office equipment from sudden power interruptions. Featuring a logical structure and high sensitivity, it ensures your communications remain active even when the main power fails. The unit provides sufficient capacity to continue sending and receiving 40-50 pages of messages during an outage, making it an indispensable tool for maintaining office productivity.
