

Feature Phone with Keypad

This mobile phone features both a touchscreen display and a physical keypad. It is equipped with a USB port and side volume controls.

Overview

Versatile Hybrid Design

This device offers a unique blend of classic usability and modern functionality, featuring a tactile physical keypad paired with a responsive touchscreen display. Designed for reliability and ease of use, it bridges the gap between traditional feature phones and basic smartphones. Its sleek aesthetic, enhanced by metallic accents, makes it a professional choice for users who value both durability and connectivity.
