

Feed Grinder and Mixer Machine

This machine integrates grinding and mixing functions to streamline feed preparation. It features a large hopper, robust grinding mechanism, and mixing chamber, ensuring stability and efficient material transfer.

Overview

Integrated Feed Processing Solution

The 9FH-500 is a specialized feed grinder and mixer machine designed to streamline agricultural feed production. By integrating grinding and mixing into a single workflow, it ensures efficient material preparation and uniform blending. Its robust construction and integrated blower system make it a reliable choice for industrial-grade feed processing.

Performance

Processing Capacity

0.5 t/h

Capacity

Technical Specifications

Motor Power	7.5 kw
Model	9FH-500
HS Code	843610

Dimensions

Dimensions (L x W x H)	1700 x 1060 x 2400 mm
------------------------	-----------------------

Features

Key Features	Integrated Grinding, Integrated Mixing, Large Hopper, Blower System, Dust Control
