Product Overview

Precision Gap Measurement

This feeler gauge set is an essential tool designed for the precise measurement of gap widths and clearances in mechanical and engineering applications. Crafted from durable, hardened spring steel, the blades feature a ground and lapped finish to ensure consistent accuracy during use. The compact design makes it ideal for checking valve clearances, spark plug gaps, and other tight tolerances in automotive and industrial settings.

Technical Specifications

Material	Hardened spring steel
Number of Blades	17
Blade Length	100 mm
Blade Width	10 mm
Type	Type B
