

# Female Threaded Copper Tee Pipe Fitting

This female threaded copper tee pipe fitting is designed for creating branch connections in plumbing and HVAC systems. Constructed from durable copper, it offers excellent corrosion resistance and high-temperature performance.

## Product Overview

### Professional Grade Copper Tee Fitting

This female threaded copper tee pipe fitting is engineered for reliable branch connections in plumbing and HVAC systems. Constructed from high-quality durable copper, it provides exceptional corrosion resistance and maintains integrity under high-temperature conditions. Its standard female threaded ends ensure compatibility with existing piping infrastructure, making it an ideal choice for potable water, heating, and cooling applications.

## Technical Specifications

Material	Copper
Connection Type	Female Threaded
Fitting Shape	Tee

## Application Suitability

Suitable Applications	Plumbing, HVAC, Potable Water, Heating Systems, Cooling Systems
-----------------------	---

## Performance Features

### Key Benefits

- Corrosion resistant material
- High-temperature performance
- Standard threading for easy installation
