

FEP MFA PFA Insulated Electrical Wire

This insulated electrical wire features FEP, MFA, and PFA insulation options. It is designed for use in extreme environments where reliability and durability are critical, and is available in various colors for easy identification.

Product Overview

High-Performance Insulated Wire

This premium insulated electrical wire is engineered for demanding industrial applications requiring exceptional durability. Featuring advanced FEP, MFA, and PFA insulation options, it provides superior resistance to high temperatures, harsh chemicals, and mechanical abrasion. Designed for reliability in extreme environments, this wire is an optimal choice for electric power transmission and distribution systems.

Technical Specifications

Key Performance Features

- High temperature resistance
- Chemical resistance
- Abrasion resistance
- High flexibility
- Ease of installation

Insulation Options

FEP, MFA, PFA

Conductor Type

Stranded

Application

Primary Applications

Electric Power Transmission • Power Distribution • Extreme Environments

Logistics & Customization

Color Availability

Available in various colors for identification and wiring management
