

Ferrule Secured Wire Rope Sling

High-strength wire rope slings are secured with durable metal ferrules, providing reliable lifting and rigging solutions. These slings are engineered for optimal load-bearing capacity and resistance to abrasion and corrosion, ensuring safe and efficient operation.

Overview

High-Strength Rigging Solutions

These ferrule secured wire rope slings are engineered for heavy-duty lifting and rigging applications across various industrial sectors. Utilizing durable metal ferrule terminations, the design ensures a permanent and secure connection that maximizes load-bearing capacity. Built to withstand demanding environments, these slings offer superior resistance to abrasion and corrosion, ensuring reliable performance and operational longevity.

Technical Specifications

Suitable Applications

- Industrial Lifting
- Rigging Operations
- Heavy Load Handling

Termination Type	Ferrule Secured
Key Features	Corrosion Resistant, Abrasion Resistant, High-Strength, Permanent Termination
