

Fiber Laser Marking Machine

This portable fiber laser marking machine is designed for precision material processing. It is available in 20W and 30W power options, providing efficient and accurate marking capabilities.

Product Overview

Precision Fiber Laser Marking

This fiber laser marking machine utilizes a high-precision laser beam to create permanent, exquisite marks on a wide variety of material surfaces. By inducing evaporation of the surface material, it exposes deeper layers to carve intricate patterns, trademarks, and characters with exceptional accuracy. Designed for industrial-grade performance, this machine is an ideal solution for applications requiring fine detail and high-precision processing.

Technical Specifications

Power Options

20 W Power Option A	30 W Power Option B
-------------------------------	-------------------------------

Available Models

- MZF-20
- MZF-30
- MZF-20A
- MZF-30A

Design	Portable
---------------	----------

Applications

Industry Applications	Electronics, Integrated Circuits, Electrical Appliances, Mobile Communication, Hardware, Precision Instruments, Jewelry, Automotive
Compatible Materials	Plastic, Metal, PVC, Building Materials
