

Fiber Laser Marking Machine for Metal

This fiber laser marking machine is designed for permanent marking and engraving on metal parts. It features a high-speed galvo scanner and a maintenance-free laser source with a service life of 100,000 hours.

Overview

High-Precision Industrial Marking Solution

This fiber laser marking machine is engineered for high-precision, permanent marking and engraving on a wide variety of metal surfaces. Its compact design ensures seamless integration into industrial workflows, while the user-friendly interface allows for efficient operation. Ideal for applications ranging from serial number engraving to custom metal part decoration, this system offers reliable performance for professional manufacturing environments.

Certifications

Compliance & Standards

CE, FDA

Technical Capabilities

Primary Applications

- Industrial marking
- Serial number engraving
- Custom metal part decoration

Material Compatibility

Metal
