

Fiber Laser Metal Cutting Machine

This fiber laser cutting machine is designed for efficiently and accurately cutting various materials. It features a robust frame, advanced control system, and safety features, making it ideal for industrial applications requiring precise metal cutting.

Overview

High-Performance Fiber Laser Cutting

This Fiber Laser Metal Cutting Machine integrates advanced optical, mechanical, and electrical technologies into a single, cohesive system. Utilizing high-performance CNC laser power, it is specifically engineered for high-speed and efficient processing of various sheet metals. Designed for industrial applications, the machine ensures precision and reliability for demanding manufacturing environments.

Technical Specifications

Technology Integration	Optical, Mechanical, Electrical, CNC
Primary Application	Sheet Metal Processing

Performance Metrics

Key Performance Indicators

1 High

Processing Efficiency

1 CNC

Control System
