

Fiber Optic Termination Box

This fiber optic termination box is made from high-quality cold-rolled steel with a surface electrostatic spraying treatment. It features a rail-type draw design and supports up to 48-core SC or 96-core LC connections.

Product Overview

Fiber Optic Termination Box

This high-quality fiber optic termination box is designed to provide a secure and protective enclosure for terminating and connecting optical fibers. Constructed from durable aluminum plate, it offers a lightweight yet firm solution for maintaining reliable network connections. Its structured design is engineered to adapt to various capacity requirements, ensuring optimal performance and minimal signal loss in indoor fiber optic network applications.

Technical Specifications

Design Features

- Lightweight and firm construction
- Structured design for capacity adaptability
- Easy cable management and organization
- Indoor application suitability

Box Material	Aluminum plate
Welding Device Material	ABS
Supported Adapters	SC/APC
