Fiber Optic Wall Mount Panel

This fiber optic panel features a standard 86 design, ensuring compatibility with standard bottom boxes. The oblique design effectively improves dust protection.

Product Overview

Fiber Optic Wall Mount Panel

This flush-mounted fiber optic panel is designed for the efficient termination and distribution of fiber optic cables. Featuring two keystone ports, it allows for seamless connection of fiber optic patch cords in both residential and commercial environments. Constructed from durable, high-quality materials, it ensures reliable performance and longevity in various installation settings.

Material & Construction

Material Composition

Component	Material
Screws	Stainless steel
Plastic parts	ABS (UL 94-V0)

Environmental Specifications

Operating Temperature

-10 °C
Min Operating Temp

60 °C
Max Operating Temp

Storage Temperature Range	-40 °C to 68 °C
Relative Humidity	10% - 90%

Product Features

Key Features

- Flush-mounted design
- Two keystone ports
- ABS UL 94-V0 flame retardant plastic
- Suitable for residential and commercial use
