

Fiberglass Handle Cultivator Hand Tool

This cultivator features a durable PE-coated fiberglass handle. It is designed with tines for efficiently breaking up soil and preparing seedbeds.

Product Overview

Professional Grade Cultivator

This durable cultivator is designed for efficient soil preparation and gardening tasks. Featuring a forged rake head and a robust PE-coated fiberglass handle, it offers both strength and comfort during extended use. The powder-painted finish ensures resistance to the elements, making it a reliable tool for professional landscaping and agricultural needs.
