Product Overview

Heavy-Duty Impact Performance

This sledge hammer is engineered for serious impact power while maintaining a lightweight profile for general striking jobs. Featuring a drop-forged 45# carbon steel head, it offers exceptional durability for tasks like demolition, driving stakes, and breaking concrete. The chip-resistant fiberglass shaft combines with a ribbed, non-slip rubber grip to ensure safety, minimize vibration, and reduce user fatigue.

Technical Specifications

Head Material	45# Carbon Steel
Finish	Black powder coating
Handle Material	Fiberglass

Features

Key Features	Drop forged, Shock-absorbing, No-slip grip, Shatterproof, Vibration dampening
--------------	---

Performance Metrics

Performance Benefits

- High impact force for heavy-duty tasks
- Cleanly ground head edges
- Ergonomic ribbed rubber handle
- Chip-resistant shaft construction
