

Fiberglass Handle Splitting Maul Axe

This splitting maul features a high-impact plastic head and a durable fiberglass handle. It is designed for splitting firewood and logs with maximum efficiency and reduced user fatigue.

Product Overview

Heavy-Duty Splitting Performance

This splitting maul is engineered for maximum efficiency when splitting firewood and logs. Featuring a durable fiberglass handle designed for superior shock absorption and grip, it helps reduce user fatigue during extended work sessions. The head is securely bonded to the handle, ensuring exceptional strength and safety for both professional and home-use applications.

Technical Specifications

Handle Material	Fiberglass
Head Material	High-impact plastic
Primary Application	Firewood Splitting, Log Splitting, Professional Use, Home Use

Key Features

Performance Features

- High-impact resistant head construction
- Shock-absorbing handle design
- Secure head-to-handle bonding
- Ergonomic grip for reduced fatigue
