

Fiberglass Handle Stonemason Hammer

This stonemason hammer is equipped with a durable fiberglass handle for enhanced strength and reduced vibration. Its hardened steel head provides exceptional impact force for shaping and breaking stone.

Product Overview

Professional Stonemason Hammer

This heavy-duty stonemason hammer is engineered for durability and high-impact performance. Featuring a hardened steel head, it provides the necessary force for shaping and breaking stone effectively. The fiberglass handle construction offers enhanced strength while significantly reducing vibration during use. Designed with an ergonomic grip, it ensures comfort and security for professional stonemasons and construction workers.
