

Fighter Trainer Aircraft

This tandem two-seat trainer aircraft is derived from the Shenyang J-6 fighter. It provides pilots with essential training in fighter jet operation, flight maneuvers, and combat tactics.

Overview

FT-6 Fighter Trainer Aircraft

The FT-6 is a tandem two-seat trainer aircraft designed to provide pilots with essential training in fighter jet operation, flight maneuvers, and combat tactics. Featuring a robust airframe and a single turbojet engine, it offers a reliable and cost-effective solution for air forces seeking to enhance their pilot training programs. The aircraft retains armament capabilities, making it highly effective for realistic combat training scenarios.

Technical Specifications

Avionics Systems

- Basic navigation
- Communication systems

Seating Configuration	Tandem two-seat
Engine Type	Single turbojet
Training Capabilities	Fighter jet operation, Flight maneuvers, Combat tactics

Operational Features

Key Benefits

Cost-effective • Robust airframe • Reliable performance

Combat Readiness	Yes
