

Fingerprint Steering Wheel Lock

This is a steering wheel lock that uses fingerprint recognition for vehicle security. It has a lock core designed to minimize the chance of unauthorized access and includes an anti-burglar keyhole.

Product Overview

Advanced Security T-Type Lock

The T-Type Auto Lock is a sophisticated steering wheel security solution designed to provide superior protection for your vehicle. Utilizing a Hyper B-Class lock core, this device minimizes the risk of unauthorized access with an incredibly low 0.03% mutual opening rate. The ergonomic T2 design incorporates anti-burglar features to ensure your car remains secure against theft attempts.
