

Fire Hose Manifold with Dual Outlets

This fire hose manifold is designed to connect multiple hoses or equipment. It features ribbed hose tail connections for secure attachment in demanding firefighting environments.

Product Overview

Fire Hose Manifold with Dual Outlets

This fire hose manifold is engineered for professional firefighting applications, allowing for the efficient splitting of water supply to multiple hoses or equipment. Featuring a robust, chrome-plated construction, it is designed to endure high-pressure environments. The dual-outlet design provides reliable connectivity for critical emergency response scenarios.

Technical Specifications

Design Features

- Chrome-plated finish
- Ribbed hose tail connections
- Robust construction

Connection Type	Special-point connection
Outlet Configuration	Dual Outlets

Compliance

Environmental Status

Green Product: No
