

Fire Resistant Document Cabinets

These fire resistant filing cabinets protect important documents from fire damage. They are available in multiple drawer configurations and constructed with insulated steel and locking mechanisms.

Overview

Secure Document Protection

These fire-resistant document cabinets are engineered to provide robust protection for critical records and sensitive files against fire damage. Constructed with high-grade insulated steel, they offer a reliable barrier for both office and home environments. With versatile drawer configurations available, these cabinets are designed to meet diverse organizational storage requirements while ensuring maximum security.
