

# Fire Suppression Centrifugal Pump

This centrifugal pump is designed for high-performance water delivery in emergency situations. Its efficient design ensures optimal water flow and pressure for effective fire suppression.

## ADDITIONAL IMAGES

## Overview

### High-Performance Fire Suppression

These fire suppression centrifugal pumps are engineered for reliable, high-volume water delivery in critical emergency situations. Designed to meet stringent international safety standards, including NFPA20 compliance, these units offer exceptional durability and consistent pressure performance. With a wide range of models available, they provide flexible installation options for various industrial and commercial fire protection systems.

## Performance Metrics

### Capacity Range

**300 GPM**

Minimum Capacity

**3000 GPM**

Maximum Capacity

### Pressure Specifications

**92 Psi**

Min Net Pressure

**288 Psi**

Max Net Pressure

**350 Psi**

Max Operation Pressure

## Compliance & Standards

### Certifications & Standards

UL Listed, NFPA20 Compliant

## Design Features

### Available Series

- XBD-D
- XBD-SLO
- XBD-SLOW
- XBD-SLS(HY)
- XBD-SLW(HY)
- XBD-DS
- XBD-DV
- XBD-DL
- XBD-GDL
- XBD-SS
- XBD-SLW
- XBD-W

### Construction Features

Split Case Design • Horizontal Configuration • Durable Casing • Stainless Steel Valve
