

Five-Thread Overlock Sewing Machine for Extra-Heavy Fabrics

This machine is designed for sewing thick to extra-heavy fabrics, such as jeans. The maximum overedging width is 6.4mm.

Overview

High-Performance Industrial Sewing

This super high-speed five-thread overlock sewing machine is specifically engineered for handling extra-heavy fabrics in demanding industrial environments. It provides durable and precise stitching, ensuring consistent quality for heavy-duty sewing operations. Designed for efficiency and reliability, this machine is an essential tool for high-volume production lines requiring robust equipment.
