

Five-Thread Overlock Sewing Machine for Medium to Thick Fabrics

This five-thread overlock sewing machine is designed for overlocking medium and thick fabrics. It provides efficient and precise overlocking, creating durable and professional seams.

Product Overview

High-Speed Industrial Overlock Solution

This high-speed five-thread overlock sewing machine is engineered specifically for industrial applications involving medium to thick fabrics. It delivers efficient, precise overlocking capabilities, ensuring durable and professional-grade seams for high-volume production. Built with robust materials, this machine is designed to provide long-term reliability for garment manufacturing and textile operations.

Technical Specifications

Application

Industrial • Garment Manufacturing • Textile Production
