

Five-Thread Overlock Sewing Machine for Thick Fabric

This is a super high-speed, five-thread overlock sewing machine designed for thick fabrics. It provides precise and efficient overlocking, ensuring durable and professional seams.

Overview

Industrial Overlock Performance

This five-thread overlock sewing machine is engineered specifically for handling medium to thick fabrics with ease. It delivers high-speed operation and consistent, durable seams, making it an essential tool for industrial sewing environments. The machine is optimized for wide edge sewing and various binding applications, ensuring professional results on heavy materials.

Technical Specifications

Primary Applications

- Wide edge sewing
- Binding applications

Max Overedging Width	6.4 mm
Thread Configuration	5-Thread
Fabric Type	Medium Fabric, Thick Fabric
