

# Fixed Wireless Data Terminal

This fixed wireless terminal provides reliable data connectivity. It features indicator lights for monitoring power, data stream, and online status.

## Product Overview

### Professional Fixed Wireless Data Terminal

The 2505 Fixed Wireless Data Terminal is a robust connectivity solution designed for high-performance data operations. Featuring a compact and ventilated chassis, this device ensures reliable heat dissipation during continuous operation. With a clear front-panel LED interface, users can easily monitor power, data stream status, upstream activity, and overall link stability in real-time.

## Technical Interface

### Front Panel Indicators

- Power Status
- Data Stream (DS) 1, 2, 3
- Upstream (US) Activity
- Online Status
- Link Connectivity

### Model ID

2505

## Physical Characteristics

### Chassis Design

Compact, Ventilated, Desktop
