Product Overview

Versatile Vegetation Management

The VMA flail mower is a robust agricultural implement engineered for high-performance vegetation management. Designed with a sturdy frame and a high-RPM rotor, it excels in demanding environments, effectively shredding grass, twigs, and cornstalks. Its adaptable design makes it an ideal solution for maintaining orchards, vineyards, and pastures.

Operational Features

Drive System

PTO-Driven

Ideal Applications

Vineyards, Orchards, Pastures, Cornstalk Shredding, Roadside Verges

Movement Mechanism

Hydraulic movement

Technical Construction

Key Components

- Heavy-duty rotor
- Rear roller
- Adjustable cutting height system

Frame Material

High-strength steel

Maintenance & Usability

Maintenance Access

Rear open bonnet design facilitates easy access for maintenance and hammer replacement.
