Product Overview

High-Performance Safety Coverall

This flame-resistant, high-visibility coverall is engineered for industrial workers operating in hazardous environments involving heat and fire risks. It combines robust construction with practical design features like reinforced triple stitching and strategic pocket placement for maximum durability and utility. Additionally, the fabric is treated with Permethrin for protection against mosquitoes, ensuring comfort and safety in diverse outdoor work settings.

Technical Specifications

Material	100% Cotton, Permethrin Treated
Fabric Weight	225 gsm
Compliance Standards	EN13688, EN ISO 11612

Design & Features

Visibility

High-Visibility Reflective Strips • Shoulder Placement • Sleeve Placement • Leg Placement
