

Flame Retardant Heat Shrink Tubing

This flexible tubing is flame retardant and halogen free. It produces low smoke when burned and provides electrical insulation and protection.

Product Overview

Flame Retardant Insulation Solution

This flame retardant heat shrink tubing is engineered for superior electrical insulation and reliable component protection. Its flexible design ensures a secure fit for wires, cables, and sensitive electronics while meeting stringent safety standards. Built for demanding environments, it offers low smoke generation and excellent thermal properties to prevent damage and abrasion.

Technical Specifications

Operating Temperature Range

-45 °C

Min Operating Temp

125 °C

Max Operating Temp

Shrink Temperature

120 °C

Compliance and Standards

Certifications & Compliances

RoHS, Sony Compliant, VW-1 Flame Retardant

Key Features

Core Characteristics

- High flexibility
- Zero halogen formulation
- Flame retardant performance
- Low smoke generation during combustion
