

Flanged Cylindrical Component with Internal Threading

This is a flanged cylindrical component designed with internal threading. Dimensional specifications are provided for various configurations.

A	B	C	D	E	THREAD: M3. 5	
10	13	15	20	25		
F	G	H	J	K	L	THREAD: M3LEFT
10	13	15	20	25	17	

Product Overview

Precision Flanged Cylindrical Component

This flanged cylindrical component is engineered for precision assembly in machinery and industrial applications. It features a robust design with integrated internal threading, ensuring reliable fastening and connection capabilities. The component is available in multiple configurations to suit specific dimensional requirements, providing versatility for various engineering projects.

Technical Dimensions

Flange Diameter	17 mm
Cylindrical Section Diameter	5 mm

Technical Specifications

Dimensional Specifications

Configuration	Available Lengths (mm)
A, B, C, D, E	10, 13, 15, 20, 25
F, G, H, J, K, L	10, 13, 15, 20, 25, 17

Available Threading	M3.5, M3 Left
