

Flanged Ductile Iron Pipe Fitting

Ductile iron pipe fitting featuring flanged connections. It is suitable for use in building materials engineering and other construction materials engineering applications.

Product Overview

Robust Flanged Ductile Iron Fitting

This flanged ductile iron pipe fitting is engineered for high-performance applications in building materials and construction engineering. Designed to provide a reliable and secure connection, it ensures durability and structural integrity in industrial and commercial plumbing or piping systems. Its robust construction makes it an ideal solution for demanding infrastructure projects.

Technical Details

Material	Ductile Iron
Connection	Flanged
Part Number	041901110 8008

Applications

Primary Applications	Building Materials Engineering, Construction Engineering, Industrial Piping, Commercial Infrastructure
