

Flanged Steel Industrial Pipe

This steel pipe is designed for industrial or mechanical applications. It features a flanged connection point at one end and multiple mounting points along its body.

Product Overview

Industrial Grade Flanged Steel Pipe

This industrial-grade steel pipe is engineered for high-performance applications in demanding environments. Featuring a robust cylindrical construction with a professional white finish, it offers both reliability and structural integrity for mechanical systems. The integrated flanged connection and built-in lifting lug facilitate efficient handling, quick installation, and secure integration into existing industrial infrastructure.

Technical Specifications

Connection Type	Flanged
Exterior Finish	White industrial coating
Design Features	Flanged connection, Lifting lug, Integrated access ports, Cylindrical body

Logistics and Handling

Handling Features

- Integrated lifting lug for overhead cranes
- Engineered for simplified site installation
