

Flanged Tee Pipe Fitting

This specialized pipe fitting is used in environmental protection engineering and other applications. The tee features a robust construction with flanges for secure connections.

Product Overview

High-Performance Flanged Tee Fitting

This flanged tee pipe fitting is engineered for demanding pipeline branching applications, offering robust structural integrity and secure connections. Designed for versatility, it supports complex piping systems across environmental protection and industrial engineering projects. With a focus on durability and reliability, this component is built to withstand rigorous operational conditions.

Key Capabilities

38000 km

Annual Production Capacity

120 Countries

Export Reach

Technical Specifications

Standard Lengths

- 6 meters
- 8.15 meters

Nominal Diameter Range

DN80 - DN2600 mm

Material

Centrifugal Ductile Iron

Compliance & Quality

Quality Compliance

Occupational Health & Safety Certified • Environmental Management Certified • Quality Management Certified

Certifications & Standards

ISO 9001, ISO 14001, GB/T 28001, BV Certified, KS Certified
