

Flap Wheel Abrasive Grinding Polishing Tool

Flap wheel designed for grinding and polishing applications. It features overlapping abrasive flaps for consistent material removal and a smooth finish.

Product Overview

Professional Abrasive Flap Wheel

This high-performance flap wheel is engineered for efficient grinding and polishing applications. Featuring overlapping abrasive flaps, it ensures consistent material removal and delivers a smooth, professional finish on various metal surfaces. Designed for durability and precision, it is an essential tool for metalworking professionals requiring reliable surface preparation.

Technical Specifications

Diameter	125 mm
Bore Size	22 mm
Grit Size	80

Performance Metrics

Maximum Operating Speed

40 m/s

Max Speed

Compliance & Standards

Certifications	ISO9001:2000
