

Flat Blade Hand Trowel

This trowel is a flat, broad-bladed hand tool used for spreading, shaping, smoothing, or applying materials such as plaster, mortar, or concrete. The blade's size and shape may vary depending on the intended use, such as pointing, bricklaying, or rendering.

Product Overview

Professional Flat Blade Hand Trowel

This flat blade hand trowel is an essential tool for professional construction, masonry, and finishing work. Designed for precision spreading and smoothing of materials like plaster, mortar, or concrete, it provides excellent control. Its robust construction ensures durability, while the ergonomic handle offers comfort for extended use on the job site.
