Tank Technology

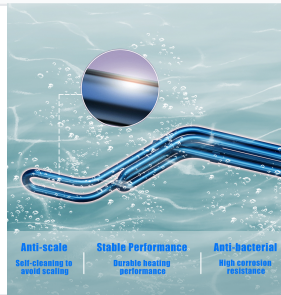

The exclusive single weld line design significantly reduces leakage risk and improves pressure resistance.

Blue Diamond Single Weld Line Tank

The inner tank utilizes a specialized single weld line design made from thickened SPCC material. This construction reduces the weld length and jointing points by up to 75% compared to triple-weld designs, resulting in a 67% reduction in leakage risk and superior pressure resistance for high-rise applications.

Heating Element

Durable heating element featuring self-cleaning technology and high corrosion resistance.

Heating Element Benefits

Anti-scale • Anti-bacterial • Self-cleaning • Corrosion Resistant
