

Flat Head Self-Drilling Screw

This flat head self-drilling screw is designed for efficient and secure fastening. It features a self-drilling tip to eliminate pre-drilling, saving time and effort.

Product Overview

Professional Self-Drilling Fastening Solution

The Flat Head Self-Drilling Screw is engineered for high-efficiency fastening across a diverse range of materials, including metal, wood, and plastic. By integrating a specialized self-drilling tip, this fastener eliminates the need for pre-drilling, significantly reducing assembly time and labor costs. Its flat head design ensures a flush, aesthetically clean finish, making it an ideal choice for professional applications where both performance and presentation matter.

Technical Specifications

Head Style	Flat Head
Drilling Capability	Yes

Application Suitability

Key Performance Benefits

- Eliminates pre-drilling
- Flush finish
- Time-saving installation
- Durable construction

Compatible Materials	Metal, Wood, Plastic
