

Flat Panel Speaker

This flat panel speaker provides powerful, high-sensitivity audio, ranging from hundreds of milliwatts to a kilowatt. It features a wide frequency bandwidth from 40 to 25KHz, excellent transient characteristics, and a flat frequency response curve for high fidelity.

Product Overview

Innovative Magnetostriction Audio

This flat panel speaker utilizes advanced magnetostriction technology to redefine acoustic performance compared to traditional cone speakers. It offers a broad frequency response and a flat curve, ensuring high fidelity and clear, non-piercing sound across wide dispersion angles. The design is maintenance-free and dust-resistant, providing flexible installation options for high-grade professional audio systems.

Technical Specifications

Frequency Bandwidth	40Hz - 25kHz
Sound Dispersion	180 degrees horizontal and vertical
Maintenance	Zero maintenance, dust-resistant design

Features

Product Highlights	High Sensitivity, Flat Frequency Response, Excellent Transient Characteristics, Wide Dispersion, Dust-Free
--------------------	--

Application & Installation

Deployment Options

- Wall-mounted
- Freestanding
- High-grade audio system integration
- Flexible manufacturing customization
