

Flat Steel Bars

These are flat steel bars, neatly arranged and secured with metal straps. The bars have a reddish-brown coating, likely for rust prevention, and are ready for transport or processing.

Product Overview

High-Quality Flat Steel Bars

These flat steel bars are supplied in neatly bundled, uniform stacks, ensuring ease of transport and handling for industrial applications. Featuring a consistent rectangular profile, the bars are finished with a protective coating to prevent oxidation and maintain structural integrity. Ideal for manufacturing, fabrication, and structural projects, this product is designed to meet the rigorous demands of professional B2B sourcing.
