

Flat Towel Embellishment Machine

This machine is designed for high-precision and efficient embroidery on flat towels. It features a robust construction and a user-friendly control panel for easy operation and monitoring.

Product Overview

High-Precision Flat Towel Embellishment

This advanced 1+1 flat towel beads machine is engineered for high-precision and efficient embroidery on flat textiles. Featuring a robust construction with a stable table and multiple thread spools, it supports diverse color options for complex designs. The integrated user-friendly control panel and precise needle system ensure consistent, high-quality results for large-scale production.

Core Capabilities

Machine Configuration

1+1 Configuration • Flat Towel Specialized • Bead Embroidery

Production Suitability

Large-scale industrial production

Technical Features

Control Interface

- User-friendly control panel
- Integrated monitoring screen
- Real-time process tracking

Automation

Automated Functions, Precise Needle System, Multi-Color Support

Design & Build

Construction

- Robust frame construction
- Stable work table
- Multiple thread spool rack

Primary Application

Intricate designs and beadwork on flat towels
