

Flat Webbing Sling for Load Lifting

This flat webbing sling is designed for lifting and securing heavy loads. Its wide contact area minimizes pressure and enhances stability, while reinforced loops facilitate easy attachment to lifting equipment.

Product Overview

High-Strength Flat Webbing Sling

This flat webbing sling is engineered for versatile and safe load lifting, featuring a high strength-to-weight ratio for efficient handling. Its soft, lightweight construction makes it ideal for use in narrow spaces while ensuring no damage to delicate or tender objects. Designed for durability and safety, the sling is non-conductive and features color-coded load identification compliant with international standards.

Technical Specifications

Rated Load Capacity

3000 kg
Max Load

Safety & Compliance

Color-coded, Non-electric conductive, Abrasion resistant, International Standard Compliant

Usage Benefits

Why Choose This Sling

- Suitable for lifting round objects
- Smooth surface prevents damage to loads
- High strength-to-weight ratio
- Lightweight and flexible for narrow spaces
- Even load distribution for longer service life

Available Protection

Yes
