

# Flatbed Semi-Trailer for Heavy Cargo

This semi-trailer is engineered for heavy-duty hauling and transportation needs. Featuring a robust chassis and a flatbed design, this trailer is suitable for carrying a variety of cargo, including construction materials, machinery, and oversized goods.

## Product Overview

### Heavy-Duty Flatbed Solution

The BYF9350 semi-trailer is engineered for heavy-duty hauling and transportation needs. Featuring a robust chassis and a flatbed design, this trailer is suitable for carrying a variety of cargo, including construction materials, machinery, and oversized goods. The flatbed configuration allows for easy loading and unloading, maximizing efficiency and minimizing downtime.

## Engineering & Performance

### Chassis and Axle System

- Robust chassis construction
- Multi-axle system for stability
- Optimized weight distribution

### Cargo Capabilities

Heavy-duty hauling, Construction materials, Oversized goods, Machinery transport

## Safety & Durability

### Safety Features

Reliable Braking System • Wear-Resistant Design
