

Flatbed Semi-Trailer for Intermodal Transportation

This flatbed semi-trailer is designed for transporting goods via road. It is equipped with a red and white striped safety bumper and multiple axles for load distribution.

Overview

Intermodal Flatbed Solution

This flatbed semi-trailer is engineered for the efficient transport of standard intermodal shipping containers via road. It features a robust design optimized for heavy-duty logistics, ensuring secure load distribution across multiple axles. Designed with safety in mind, it includes highly visible reflective bumper markings to enhance operational safety on public highways.

Key Features

Structural Details

- Multiple axle configuration for load distribution
- Red and white striped safety rear bumper
- Compatible with standard ISO shipping containers

Compliance Status

Road Safety Compliant • Standardized Dimensions

Primary Application

Intermodal Transportation, Container Logistics, Heavy-Duty Road Haulage
