

Flatbed Utility Tricycle

This motorized tricycle is equipped with a flatbed in the rear. It is designed for transporting cargo.

Overview

Rugged Utility Transportation

This flatbed utility tricycle is engineered for efficient goods transport in versatile professional environments. Featuring a stable three-wheeled configuration with a motorcycle-style front end, it combines maneuverability with high load capacity. The durable metal frame and spacious rear flatbed make it an ideal solution for last-mile delivery and industrial material handling.
