

Flex-Wing Rotary Mower

This flex-wing rotary mower is designed for compact and utility tractors. It features an increased side frame depth that enhances cut material capacity.

ADDITIONAL IMAGES

Product Overview

The 9G series features a durable steel construction and compact design for high maneuverability in pastures and fields.

Professional Grade Flex-Wing Rotary Mower

The 9G series mower sets a high standard for flex-wing cutters, specifically designed for compact and utility tractors. It features the deepest deck in the industry to increase material capacity and improve cutting performance in challenging environments. This scientific design is ideal for cleaning brush, slashing grassland, and improving uneven ranch land with ease of operation and maintenance.

Key Performance Metrics

Performance Highlights

1500 mm

Max Cutting Width

300 mm

Max Cutting Height

30 HP

Max Matched Power

Technical Specifications

Model Comparison

Model	Width (mm)	Length (mm)	Height (mm)	Cutting Width (mm)	Weight (kg)	Power (HP)
9G-1.0	1200	1400	800	1000	260	18-30
9G-1.5	1700	1900	900	1500	350	25-30

Design & Construction

Detailed view of the adjustment mechanism and safety chain curtains designed to contain debris during operation.

Construction Features

- Heavy-duty steel frame with red protective finish
- Galvanized deck for superior corrosion resistance
- Deep deck design for increased material capacity
- Integrated safety chain curtains to prevent debris scattering
- Adjustable cutting height for versatile terrain management

Safety Equipment

Chain Guards • Protective Housing • Projectile Hazard Shielding

Operation & Compatibility

The robust power transmission system featuring a PTO shaft and heavy-duty gearbox for consistent cutting performance.

Linkage System

3-point mounted

Power Transmission

PTO Shaft, Gearbox Driven, Hydraulic System Support
