

Flexible Abrasive Wheel

These flexible wheels are suitable for grinding, blending, and finishing on diverse materials. The layered construction provides controlled flexibility and conformability for smooth, consistent results.

Product Overview

Flexible Abrasive Wheel Overview

Flexible DC wheels are versatile tools engineered for grinding, blending, and finishing tasks across a wide range of materials. Their unique layered construction provides controlled flexibility and superior conformability, ensuring smooth and consistent results during operation. These wheels are highly effective for material removal and achieving fine surface finishes on metal, wood, and plastic applications.

Technical Specifications

Key Features

- Layered construction for controlled flexibility
- High conformability for smooth finishes
- Efficient material removal capabilities
- Suitable for grinding, blending, and finishing

Available Options

Various Grits • Various Sizes

Compatible Materials

Metal, Wood, Plastic
